DETAILED ACTION

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: **name field 32**.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

Claim 22 is objected to because of the following informalities: the applicant should place a period "." at the end of the claim. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3736

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-30 are rejected under 35 U.S.C. 102(a) as being anticipated by Goldenberg et al.

“Early statistical detection of anthrax outbreaks by tracking over-the-counter medication sales”

Proceedings of the National Academy of Sciences of the United States of America.

Goldenberg et al. teaches the use of an over the counter medication sales statistical detection system of detecting an anthrax attack. This data compiled includes historical statistical data and present data to see if the volume of sales is indicative of an outbreak. The purchasing of OTC medication is synonymous with “monitoring occurrences of at least one health symptom;” since OTC medication purchases are symptoms of fever, nausea, vomiting, headaches, etc.

In regards to claim 2, the system itself is considered by the Examiner to be an emergency services dispatcher since the identification of a outbreak is public health information set up as an emergency service run by a dispatcher.
